EDF Energies Nouvelles continues to source photovoltaic modules

EDF Energies Nouvelles announces the signing of two new contracts for photovoltaic modules to meet its solar energy development needs.

The first contract with Solarfun (Nasdaq: SOLF) involves a firm order of 17 MWp and an option for a further 5 MWp of monocrystalline silicon modules. The order was placed jointly with Photon Power Technologies, EDF Energies Nouvelles' solar energy partner in France, which will take around 20% of the order.

The second contract with Yingli Green Energy (NYSE: YGE), involves a firm order of 7 MWp and an option to order another 6 MWp of polycrystalline silicon modules.

The modules are for delivery in 2008. They will be used to build ground-and building integrated photovoltaic plants expected to be brought into service in 2008 and 2009.

By signing these contracts with two leading Chinese players vertically integrated in solar technology, EDF Energies Nouvelles is continuing to diversify its sourcing.

About EDF Energies Nouvelles

Founded in 1990, EDF Energies Nouvelles is a world-class player in the green electricity generation market, with gross installed capacity of 1,188 MW worldwide at 30 June 2007 (including net capacity of 868 MW), plus 1,199 MW in gross capacity under construction (including 630 MW net). With a presence in 9 European countries and in the United States, EDF Energies Nouvelles operates in four renewable energy segments (wind, solar, biomass and hydro). Wind energy currently accounts for more than 80% of its installed capacity. With its unique profile as an integrated operator, EDF Energies Nouvelles, which posted 2006 revenues of €334.8 million and EBITDA of €91.8 million, has a presence spanning the entire value chain, from development and construction through to production and operations & maintenance. The Group also pursues the development and sale of structured assets, which consists primarily in selling renewable energy generating assets to individuals or to energy services companies. EDF Energies Nouvelles is a 50%-owned subsidiary of the EDF group. Since 28 November 2006, EDF Energies Nouvelles has been listed in Compartment A of Eurolist by Euronext Paris (code: EEN, ISIN code: FR0010400143). www.edf-energies-nouvelles.com

About Photon Power Technologies

Photon Power is a French company set up in 2006, in which EDF Energies Nouvelles has held a 20% stake since July 2007. Photon Power Technologies specialises in supplying turnkey photovoltaic facilities, both roof- and ground-based, for small businesses, regional authorities and individuals in France. www.photonpower.fr
