EDF Energies Nouvelles signs a power purchase agreement for a 201 MW wind energy project in the United States

enXco, the US subsidiary of EDF Energies Nouvelles, announces the signing of a power purchase agreement with US utility Indianapolis Power & Light Company (IPL).

This 20-year agreement covers the sale of the electricity generated by the 201 MW Lakefield wind farm to be built in southwestern Minnesota.

The Lakefield facility, which will be developed, built and owned by enXco, will consist of 134 1.5 MW turbines supplied by US manufacturer GE Energy. Construction is scheduled to be completed by the end of 2010. This project is subject to the approval of the Indiana Utility Regulatory Commission (IURC) as well as the Minnesota Public Utility Commission (MPUC).

This agreement follows on from a first contract signed with IPL for the 106 MW Hoosier wind farm, currently being built in Indiana.

This new project will strengthen the Group's positions in Minnesota, where enXco is very active, and will increase EDF Energies Nouvelles' gross capacity in the state to 608.5 MW.

About EDF Energies Nouvelles

With operations in ten European countries and in America, EDF Energies Nouvelles is a market leader in renewable energies. With a development focused on wind energy for several years and more recently on solar photovoltaic, now a second priority avenue of development, the Group is also present in other segments of the renewable energies market: small hydro, biomass, biofuel and biogas. In addition, the Group is expanding its presence in the distributed renewable energies sector.

EDF Energies Nouvelles is a 50 %-owned subsidiary of the EDF Group. Since November 2006, EDF Energies Nouvelles is listed in Euronext Paris, code "EEN", ISIN code: FR0010400143).
