

Paris, July 8th, 2008

EDF Energies Nouvelles is commissioning one of the largest wind farms in France

Located in Villesèque-des-Corbières (Aude department), this wind farm comprising 22 wind turbines is the most powerful facility in the Languedoc-Roussillon region. With installed capacity of **50.6 MW**, it is also one of the largest wind farms in France.

The site boasts high quality wind energy potential and is located in France's first wind energy development zone (ZDE)*. Its output is equivalent to the annual electricity consumption of 75,000 inhabitants, i.e. one and half times the population of Narbonne.

The Villesèque wind farm is equipped with 2.3 MW turbines supplied by German manufacturer Enercon.

For the Group, this is the first in a series of major wind energy projects that will be commissioned in France by the end of 2008, including the Chemin d'Ablis (52 MW in the Eure-et-Loir department) and Salles-Curan (87 MW in the Aveyron department) facilities.

To date, EDF Energies Nouvelles has 483.6 MW in gross capacity either in service or under construction in France.

**Instituted in 2005, ZDEs encourage municipal authorities to take a global view of the development of local areas while protecting their local heritage. They enable wind energy facilities to benefit from the purchase obligation for electricity generated at a fixed tariff.*

About EDF Energies Nouvelles

Founded in 1990, EDF Energies Nouvelles is a world-class player in the green electricity generation market, with gross installed capacity of 1,443 MW worldwide at 31 December 2007, plus 1,100 MW in gross capacity under construction. With a presence in nine European countries and in the United States, EDF Energies Nouvelles operates in four renewable energy segments (wind, solar, biomass and hydro). Wind energy currently accounts for more than 80% of its installed capacity. With its unique profile as an integrated operator, EDF Energies Nouvelles, which posted 2007 revenues of €560 million has a presence spanning the entire value chain, from development and construction through to production and operations & maintenance. The Group also pursues the development and sale of structured assets, which consists primarily in selling renewable energy generating assets to individuals or to energy services companies.

EDF Energies Nouvelles is a 50%-owned subsidiary of the EDF group. Since 28 November 2006, EDF Energies Nouvelles has been listed in Compartment A of Eurolist by Euronext Paris (code: EEN, ISIN code: FR0010400143). www.edf-energies-nouvelles.com
